## SUMMARY

Full Stack Developer with 2+ years of experience developing web-apps and hosting it on the web. Skilled in developing web-apps in MERN, Next.js. Regularly exceed performance targets and possess advanced analytical and problem solving skills. Adept at leveraging cutting-edge tools for 3D animations and platforms to achieve better websites.

## SKILLS

**Front-end:** JavaScript, React.js, Next.js, Typescript, GSAP, THREE.js, Redux, Figma

**Back-end:** Node.js, MongoDB, SQL, Supabase, Firebase, AWS

## PROJECTS

MERN	<b>Blockchain for Impact</b> BFI is a dashboard to track and monitor various tasks with timeline, with all the operations like create, read, update, delete. users can login to create, update and delete and can view without login.	<a href="#">Open link</a>
React.js, Fireabase	<b>Teambo</b> The project is a web application developed using React.js and Firebase. The application provides a user-friendly interface for managers to create assessments, define tasks, assign deadlines, and allocate them to specific team members. Teammates receive notifications of their assigned tasks and can update their progress within the app.	<a href="#">Open link</a>
React.js, Supabase	<b>Vendorcontacts</b> It's a web-app, where vendors and designers can chat with each other and vendors can showcase their profile. designers can approach vendors for their projects and can create groups with multiple vendors.	<a href="#">Open link</a>
React.js, AWS	<b>DNS Manager</b> The DNS Manager website provides users with a comprehensive platform to efficiently manage their Domain Name System (DNS) settings. Users can easily update, configure, and optimize their DNS records, including A, CNAME, MX, TXT, and other records, all through a user-friendly interface.	<a href="#">Open link</a>
React.js, Springboot	<b>Medsavvy</b> It's a e-commerce website, where users can login, view, buy medicines, add medicines to cart and admins can login, add medicines and cost of the medicine and also the report data of medicines.	<a href="#">Open link</a>
Next.js, MongoDB	<b>Blog</b> Blog website, where users can post multiple blogs and can read other blogs. Authors can also login to post blogs.	<a href="#">Open link</a>

## EDUCATION

8/2018 - 6/2022	<b>Saranathan college of engineering</b> Bachelors of engineering - Computer Science and engineering	<b>Undergraduate</b>
-----------------	---	----------------------

## EXPERIENCE

02/2022 - present Full-Time	<b>Jr. Software Engineer</b> <ul style="list-style-type: none"><li>Writing clean, maintainable, and efficient code using programming languages such as HTML, CSS, JavaScript, and frameworks like React.</li><li>Utilizing version control systems such as Git to manage code repositories, track changes, and collaborate with other team members effectively.</li></ul>	<b>Cognizant</b>
